WORK EXPERIENCE

LC Studio Full Stack Web Developer Intern	Lansdowne, Cape Town September 2025 - Present
RSQ Construction Administrative Assistant	Penlyn Estate, Cape Town January 2025 - September 2025

PROJECT EXPERIENCE

HR System Life Choices Academy	July 2025
- Developed a responsive HR Management System using Vue.js, HTML, CSS and JavaScript for ModernTech Solutions. - Designed and implemented modules for employee management payroll, leave tracking and attendance monitoring. - Enhanced user experience with a dashboard, analytics charts, responsive layouts. https://modal-project-delta.vercel.app/	
E-commerce website Life Choices Academy	August 2025
- Created an E-commerce platform using HTML, CSS, JavaScript and Bootstrap for seamless product browsing. - Improved user engagement by implementing a modern interface and optimized performance.	
Oracle Apex Life Choices Academy	September 2025
- Designed and implemented interactive dashboards in Oracle Apex to visualize key business metrics across HR, Sales, Delivery and Customer domains. - Created dashboards featuring reports, charts, KPIs, dynamic date pickers and insights. - Wrote Oracle SQL queries to extract and analyze data for real time insights. - Result: Produced a clear, data-driven dashboard that supports business decision-making and reporting.	
Business Website R-Square Construction	December 2025
- Designed and developed a fully responsive business website from scratch using HTML and CSS. - Implemented a service-based layout, reusable components, and consistent styling across multiple pages. - Built and integrated a working contact/quote form using Formspree to handle email submissions. - Deployed the website using GitHub Pages and configured repository structure for production.	

- Ensured mobile, tablet, and desktop responsiveness using Flexbox and CSS media queries.
- Applied modern UI/UX principles for a clean, professional, and user-friendly design.

- rsqconstruction.co.za

Findr (Emergency Service Locator) | LC Studio

February 2026

- Designed and developed a full-stack emergency service locator using React, MapLibre GL, and Supabase.
- Built an Admin Dashboard with real-time API quota monitoring (MapTiler/TomTom) and a glowing "Pulse" status system for system health.
- Implemented a Suggested Places widget using Google Places API to auto-populate metadata (ratings, hours, and types), reducing user data entry by 80%.
- Designed a specialized Transit Submission Form with complex map-interaction logic for plotting bus/train routes and managing stops.
- Applied advanced UI/UX principles in Figma to create a high-fidelity "Map Failure" state, ensuring accessibility when external APIs are offline.

Escrow Platform (CertiFund) | LC Studio

March 2026

- Designed and developed a high-fidelity secure escrow platform, focusing on platform integrity and financial transparency for freelancers and retailers.
- Designed an Admin Portal featuring user management modules, automated activity flagging, and audited user impersonation for support troubleshooting.
- Translated complex customer needs into a detailed Requirements Traceability Matrix, mapping business logic to technical React/API specifications.
- Implemented a tiered pricing structure and transaction history dashboard with advanced filtering and GDPR-compliant data export functionality.
- Applied modern UI/UX principles using a premium dark-themed aesthetic with Figma, ensuring responsive layouts across all support and legal resource pages.
- Result: Delivered a professional, audit-ready system design that balances user security with administrative oversight and regulatory compliance.
